Professional Summary

Dedicated Backend Developer with a strong focus on Node.js, specializing in the design and development of robust RESTful APIs and scalable database-driven applications. Proven experience in architecting efficient database schemas and engineering high-performance backend systems for diverse web platforms, including dynamic sports-related projects. Possesses a solid foundation in complex problem-solving, system architecture, and the implementation of modern backend technologies. A highly motivated professional committed to continuous learning and adopting industry best practices to deliver secure, scalable, and impactful software solution.

Experience

Software Engineer Intern at Sprints Jun 2025 - Aug 2025

Completed an intensive Web Development training program with Sprint, focusing on modern web technologies and practical implementations. Developed hands-on skills in building responsive, user-centric applications from scratch while following industry best practices. Collaborated on real-world projects that bridged the gap between theoretical concepts and scalable, functional code.

Technologies: HTML | CSS | python | Git | GitHub

Education

Faculty of Computers & Informatics, Tanta University sep 2022 - jun 2026

Grade: very good

Skills

Technical Skills :

Backend Frameworks: Node.js, Express.js, NestJS
Programming Languages: JavaScript, TypeScript, c++
APIs & Communication: RESTful APIs, GraphQL, WebSockets (Socket.io), JWT Authentication
Databases: PostgreSQL, Microsoft SQL Server, MongoDB
ORM / ODM: Prisma, Mongoose, TypeORM
DevOps & Tools: Git, GitHub, CI/CD (GitHub Actions), Postman
Frontend Technologies: React.js, HTML5, CSS3, Tailwind

Professional & Engineering Skills :

Core Concepts: Data Structures, Algorithms, Complex Problem Solving
Software Architecture: SOLID Principles, Design Patterns, Object-Oriented Programming (OOP), Microservices
Best Practices: Clean Code, API Documentation

Personal & Soft Skills: Continuous Research & Self-Learning, Effective Teamwork & Collaboration, Time & Task Management , Critical Thinking & Adaptability.

Projects

FinTech Banking System | [GitHub Repository](#)

.Architected and developed a full-stack financial application providing multi-currency account management (Checking & Savings) and automated savings goals tracking.Engineered a secure payment flow integrating Stripe for real-time deposits, alongside an internal transfer engine with robust backend transaction validations.Implemented advanced security measures including Two-Factor Authentication (2FA), role-based access control (Admin/User), and JWT-based session management.Built a real-time notification system using WebSockets and designed a dynamic, responsive UI with actionable dashboards for seamless user and admin experiences

.Technologies Used: NestJS, React.js, TypeScript, PostgreSQL, Prisma ORM, Stripe API, WebSockets, Tailwind CSS, React Query, JWT & 2FA

E-Commerce API | [Github](#)

This project is a robust backend architecture for an E-commerce application built entirely using the NestJS framework.The system provides comprehensive features including secure authentication (including Google OAuth), electronic payment processing, email notifications, and cloud-based media storage.

Technologies: NestJS, TypeScript, MongoDB (via Mongoose), Stripe (for payments), JWT & Passport (for authentication), Cloudinary (for image management), and Nodemailer (for emails).

Online Store

The project is a comprehensive full-stack e-commerce platform divided into three main modules: a customer-facing frontend, an admin dashboard, and a backend server.The system utilizes a modern, interactive UI for a seamless user experience, while securely handling data, user authentication, and payment processing on the backend.It is built using the latest React and Node.js technologies to ensure high performance and responsive design, connected via a robust RESTful API architecture

Technologies:Node.js & Express.js, MongoDB & Mongoos, JWT & Bcrypt, Stripe, Multer, React, Vite, Tailwind CSS, Axios, React Router DOM.

Language

Arabic: Native | **English:** Upper Intermediate
